METHODOLOGY

This report was prepared with the use of PMR Market Insight methodology. PMR's proprietary Market Insight methodology supports the comprehensive development of industry analysis reports. It defines how data should be gathered for such reports and, once collected, how it should be analysed as to obtain a reliable picture of the researched market. PMR Market Insight also precisely defines report content and structure. Industry reports prepared with PMR Market Insight methodology rely on information garnered from existing statistical sources, industry (trade publications and the internet), and general and official sources, as well as PMR's in-house databases and primary research independently conducted by PMR. The sources are selected individually for each project. PMR Market Insight has evolved over PMR's more than fifteen years of experience in developing industry analyses on markets of the Central and Eastern Europe.
