

SUSTAINABLE CONSTRUCTION IN POLAND

2025

Crucial trends and development forecasts

TABLE OF CONTENTS

Executive summary	7
Introduction	23
Purpose of the report	23
How to understand the concept of sustainable construction?	23
Idea of sustainable construction and its source	24
Why is sustainable construction so important?	25
Analysis of the construction market environment in the context of sustainable construction development prospects	27
Political environment	27
Legal environment	30
Economic environment	41
Socio-cultural environment	45
Technological environment	47
Sustainable construction in Poland – assessment by market participants	52
Factors for the choice of a construction material	52
CO ₂ reduction strategy in Polish companies in the construction industry	56
Share of sustainable construction in the total construction market in Poland – estimates by market participants	58
Sustainability reporting by the largest companies in the construction industry in Poland	61

Development rate of sustainable construction in Poland	64
Increase in the share of sustainable construction in total construction market in Poland by 2030 – estimates by market participants	64
Number of sustainability reports published since 2005 in the Polish construction industry	67
Number of environmental product declarations (EPDs)	69
Product environmental declarations – objectives and application.....	69
Environmental product declarations issued worldwide	72
Environmental product declarations issued in Poland	72
Multi-criteria certification of buildings in Poland	76
Number of multi-criteria certificates in Poland and other countries of Central and Eastern Europe.....	76
Multi-criteria certification systems used on the Polish market	77
Number of certified buildings in Poland.....	81
Sectoral breakdown of certified investments in Poland	83
Area of certified buildings in Poland	85
Certification of office buildings in Poland.....	87
Certification of warehouse and logistics buildings in Poland	88
Certification of commercial buildings in Poland	89
Certification of residential buildings in Poland	90
Certification of other types of buildings in Poland	91
Regional breakdown of multi-criteria certificates awarded	92
Number of investments in Poland with more than one certificate.....	93
Key conclusions from a review of certified buildings in Poland	94
Areas of sustainable construction in Poland that will develop fastest	95
Energy efficiency – assessing the solutions' potential popularity.....	97
Energy transition (RES development) in Poland – assessment of the solutions' potential popularity	99
Electrification – assessing the solutions' potential popularity	101
Climate change adaptation – assessing the solutions' potential popularity	102
Digitalisation – assessing the solutions' potential popularity.....	104
Circular economy – assessing the solutions' potential popularity	106
Sound insulation and interior acoustics – assessing the solutions' potential popularity	108
Decarbonisation – assessing the solutions' potential popularity.....	109
Building materials best suited to sustainable construction on the Polish market	112
Construction technologies conducive to the implementation of sustainable construction principles on the Polish market	114

Impact of sustainable construction principles on the prices and sales of manufactured building materials on the Polish market	116
Price sensitivity – sustainable construction issues on the Polish market	120
Barriers to the growth of sustainable construction in Poland	122
Factors hampering sustainable construction – opinions of the Polish construction market participants.....	122
Drivers to the growth of sustainable construction in Poland	126
Factors driving sustainable construction – opinions of the Polish construction market participants.....	126
Leaders of change in implementing sustainable building solutions in Poland	130
Different construction companies' experience in sustainability reporting on the Polish market.....	130
Building material manufacturers with the highest number of EPDs issued in Poland.....	137
Ranking of certified buildings' designers on the Polish market.....	139
Ranking of certified buildings' contractors on the Polish market.....	140
Ranking of consultants certifying building on the Polish market.....	141
Ranking of certified buildings' owners/developers on the Polish market.....	142
Leaders of sustainable construction in the Polish market according to market players.....	144
Climate objectives of companies operating in the Polish construction market.....	145
Taxonomic disclosures of companies operating in the Polish construction market.....	149
Sustainability rankings and ratings.....	163
Sustainability rankings.....	163
Sustainability ratings.....	167
Case studies	176
General contractors active on the Polish market.....	176
Building materials manufacturers active on the Polish market.....	185
Property developers active on the Polish market.....	193
Methodology of the report	201
List of graphs	207
List of tables	212
About PMR	216

LIST OF GRAPHS

1.	Structure of annual CO ₂ emissions in global terms, 2022.....	26
2.	Allocation of the KPO funds, 2024	43
3.	Difference in perception of climate change in Europe and Poland – climate change as a very serious problem, Eurobarometer (%), 2013-2023.....	46
4.	Difference in perception of the responsibility of business and industry for addressing climate change issues in Europe and Poland – industry and business responsible for addressing climate change issues, Eurobarometer (%), 2013-2023.....	46
5.	Carbon intensity of electricity (g CO ₂ /kWh), 2023.....	48
6.	Factors for the choice of building materials in Poland (points), 2022-2024	53
7.	Paying attention by architects, investors and construction contractors in Poland to reducing CO ₂ emissions using specific materials (%), 2022-2024	55
8.	Percentage of companies operating on the Polish construction market that cannot estimate the share of sustainable construction in the residential construction sector (%), December 2024	59
9.	Percentage of companies operating on the Polish construction market that cannot estimate the share of sustainable construction in the non-residential construction sector (%), December 2024	59
10.	Percentage of companies operating on the Polish construction market that cannot estimate the share of sustainable construction in the civil engineering construction sector (%), December 2024	60
11.	Estimated share of sustainable construction in total construction and assembly output in residential construction (%), 2023-2024	60
12.	Estimated share of sustainable construction in total construction and assembly output in non-residential construction (%), 2023-2024.....	61
13.	Estimated share of sustainable construction in total construction and assembly output in civil engineering construction (%), 2023-2024.....	61

14. Estimated share of sustainable construction in total construction and assembly output in residential construction in 2030 (%), 2023-2024	65
15. Estimated share of sustainable construction in total construction and assembly output in non-residential construction in 2030 (%), 2023-2024	65
16. Estimated share of sustainable construction in total construction and assembly output in civil engineering construction in 2030 (%), 2023-2024	65
17. Forecast time of predominance in the construction breakdown of buildings that meet the conditions of sustainable construction in Poland (%), 2022-2024	66
18. Number of sustainability reports or publications of a similar nature published by the surveyed companies, 2005-2024	67
19. Number of sustainability reports or publications of a similar nature published by the surveyed companies, by company's business profile, 2005-2024	68
20. Global number of EPD declarations and its change (% YoY), 2011-2024	72
21. Number of EPDs issued by the ITB in Poland based on declarations available on the ITB website, 2010-2024	73
22. Number of EPDs issued by the ITB in Poland based on certificate numbering, 2010-2024	73
23. Structure of EPDs issued by the ITB in Poland (%), by product categories covered by certification, 2010-2024	75
24. Number of buildings with a multi-criteria certificate in Poland and in the rest of the CEE region, March 2017-March 2023	76
25. Share of buildings with a multi-criteria certificate in Poland and in the rest of the CEE region (%), March 2017-March 2023	77
26. Share of individual multi-criteria certification systems in terms of the number of certified buildings in Poland (%), March 2024	78
27. Number of buildings subject to multi-criteria certification in Poland and its change (% YoY), March 2017-March 2024	81
28. Annual increase in the number of certificates issued, March 2017-March 2024	82
29. New and existing certified buildings in Poland (%), by area of buildings, March 2024	83
30. New and existing certified buildings in Poland (%), by number of buildings, March 2024	83
31. Sectoral breakdown of certified buildings (%), March 2017-March 2024	84
32. Sectoral breakdown of multi-criteria certificates in Poland (%), in volume terms), December 2024	84
33. Multi-criteria certified buildings in individual sectors in Poland (%), by number of certified buildings, December 2024	85
34. Total area of certified buildings in Poland (thousand m ²), March 2017-March 2024	85
35. Average area of a certified building (thousand m ²), March 2017-March 2024	86
36. Area of multi-criteria certified buildings in individual sectors in Poland (%), by area of certified buildings, December 2024	86
37. Number of buildings, area of multi-criteria certified buildings and certificates awarded in Poland (%), December 2024	87
38. Certified office area compared to the total modern office area in Poland (million m ²), 2017-2023	88

39. Certified warehouse and logistics area (thousand m ²) and its change (% YoY), March 2018-March 2024	88
40. Share of certified warehouse and logistics area in the total modern warehouse and logistics area in Poland (%), 2023	89
41. Certified commercial area compared to the total modern commercial area in Poland (million m ²), 2017-2023	89
42. Share of certified commercial area in the total modern commercial area in Poland (%), 2023	90
43. Number of residential buildings covered by the certificate, March 2017-March 2024.....	90
44. Area of residential buildings covered by the certificate (thousand m ²), March 2017-March 2024	91
45. Area of hotel facilities covered by the certificate (thousand m ²), March 2017-March 2024	91
46. Territorial breakdown of multi-criteria certificates awarded (number of certificates), December 2024	92
47. Investments with an active multi-criteria certificate (%), December 2024.....	93
48. Assessment of the development potential for sustainable construction areas (points), 2022-2024	96
49. Energy efficiency in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	98
50. Energy transition in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	100
51. Electrification in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	101
52. Climate change adaptation in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	103
53. Digitalisation in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	105
54. Circular economy in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	107
55. Sound insulation and interior acoustics in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	108
56. Decarbonisation in the Polish construction industry – assessment of the solutions' potential popularity (points), 2022-2024.....	110
57. Assessment of the potential of building materials in the Polish construction industry (points), 2022-2024	112
58. Assessment of the potential of construction technologies in the Polish construction industry (points), 2022-2024	114
59. Assessment of the impact exerted by sustainable construction principles implemented so far on the final price of manufactured materials on the Polish market (%), 2023-2024	116
60. Increase in production costs aimed to reduce CO ₂ emissions acceptable to manufacturers on the Polish market (%), 2022-2024.....	117
61. Assessment of the growth in sales of sustainable building materials – in relation to other materials in the Polish market (%), 2022-2024.....	118

62. Assessment of the growth in sales of sustainable building materials in the Polish market (%), 2022-2024	119
63. Increase in the cost of building materials aimed to reduce CO ₂ emissions acceptable to architects, investors and construction contractors in the Polish market (%), 2022-2024	120
64. Factors hampering the development of sustainable construction in the Polish market (points), 2022-2024	123
65. Factors driving the development of sustainable construction in the Polish market (points), 2022-2024	127
66. Number of EPDs issued by the ITB in Poland, broken down by leading companies in this area, based on declarations available on the ITB's website, 2010-2024	138
67. Ranking of certified buildings' designers: number of certified buildings in the Polish market, December 2024	139
68. Ranking of certified buildings' designers: floor area of certified buildings in the Polish market (thousand m ²), December 2024	140
69. Ranking of certified buildings' contractors: number of certified buildings in the Polish market, December 2024	140
70. Ranking of certified buildings' contractors: floor area of certified buildings in the Polish market (thousand m ²), December 2024	141
71. Ranking of multi-criteria certification consultants: number of certifications carried out in the Polish market, December 2024	142
72. Ranking of multi-criteria certification consultants: floor area of certifications carried out in the Polish market (thousand m ²), December 2024	142
73. Ranking of certified buildings' owners/developers: number of certified buildings in the Polish market, December 2024	143
74. Ranking of certified buildings' owners/developers: floor area of certified buildings in the Polish market (thousand m ²), December 2024	143
75. Average percentage of taxonomy-eligible activities of the players in the Polish construction market, January 2025	150
76. Taxonomy-eligible revenue (%), by contractor, January 2025	151
77. Taxonomy-eligible revenue (%), by property developer, January 2025	152
78. Taxonomy-eligible revenue (%), by building materials manufacturer, January 2025	152
79. Taxonomy-eligible CapEx (%), by contractor, January 2025	153
80. Taxonomy-eligible CapEx (%), by property developer, January 2025	153
81. Taxonomy-eligible CapEx (%), by building materials manufacturer, January 2025	154
82. Taxonomy-eligible OpEx (%), by contractor, January 2025	155
83. Taxonomy-eligible OpEx (%), by property developer, January 2025	155
84. Taxonomy-eligible OpEx (%), by building materials manufacturer, January 2025	156
85. Average percentage of taxonomy-aligned activities of the players in the Polish construction market, January 2025	157
86. Taxonomy-aligned revenue (%), by contractor, January 2025	158
87. Taxonomy-aligned revenue (%), by property developer, January 2025	158
88. Taxonomy-aligned revenue (%), by building materials manufacturer, January 2025	159

89. Taxonomy-aligned CapEx (%), by contractor, January 2025.....	160
90. Taxonomy-aligned CapEx (%), by property developer, January 2025.....	160
91. Taxonomy-aligned CapEx (%), by building materials manufacturer, January 2025.....	161
92. Taxonomy-aligned OpEx (%), by contractor, January 2025.....	162
93. Taxonomy-aligned OpEx (%), by property developer, January 2025.....	162
94. Taxonomy-aligned OpEx (%), by building materials manufacturer, January 2025.....	163

LIST OF TABLES

1. EU's growing climate ambitions.....	28
2. Pillars of ESG.....	33
3. Deadlines for ESG reporting obligations.....	35
4. Non-financial reporting obligations after the introduction of the EU Taxonomy.....	37
5. Individual stages of implementing the CSRD in the EU countries.....	38
6. Key differences between the NFRD and CSRD.....	40
7. EU funds (€ bn) allocated to Poland for 2021-2027 under the Partnership Agreement.....	42
8. List of companies offering energy consumption services (ESCO type) on the Polish market in 2024.....	44
9. Factors for the choice of building materials in Poland (points), by primary business profile, December 2024.....	54
10. Factors for the choice of building materials in Poland (points), by construction type, December 2024.....	54
11. Paying attention by architects, investors and construction contractors in Poland to reducing CO ₂ emissions using specific materials (%), by primary business profile, December 2024.....	55
12. Paying attention by architects, investors and construction contractors in Poland to reducing CO ₂ emissions using specific materials (%), by construction type, December 2024.....	55
13. CO ₂ reduction strategy in the activity of the manufacturers of building materials in Poland (%), 2022-2024.....	57
14. CO ₂ reduction strategy in the activity of the manufacturers of building materials in Poland (%), by construction type to which the manufactured products are mainly supplied, December 2024.....	57
15. CO ₂ reduction strategy in the activity of design companies, contractors and investors in Poland (%), 2022-2024.....	57
16. CO ₂ reduction strategy in the activity of design companies, contractors and investors in Poland (%), December 2024.....	58

17. CO ₂ reduction strategy in the activity of design companies, contractors and investors in Poland (%), by construction type, December 2024.....	58
18. Percentage of the leading companies in the Polish construction industry publishing sustainability reports or documents of a similar nature (number and share, %), December 2024.....	62
19. Language versions of sustainability reports of the leading companies in the Polish construction industry (%), 2022-2024.....	63
20. Forecast time of predominance in the construction breakdown of buildings that meet the conditions of sustainable construction in Poland (%), by primary business profile, December 2024.....	66
21. Forecast time of predominance in the construction breakdown of buildings that meet the conditions of sustainable construction in Poland (%), by construction type, December 2024.....	67
22. Assessment of the development potential for sustainable construction areas (points), by primary business profile, December 2024.....	96
23. Assessment of the development potential for sustainable construction areas (points), by construction type, December 2024.....	97
24. Energy efficiency in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	98
25. Energy efficiency in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024.....	99
26. Energy transition in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	100
27. Energy transition in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024.....	100
28. Electrification in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	101
29. Electrification in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024.....	102
30. Climate change adaptation in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	103
31. Climate change adaptation in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024.....	104
32. Digitalisation in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	105
33. Digitalisation in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024.....	106
34. Circular economy in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	107
35. Circular economy in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024.....	107
36. Sound insulation and interior acoustics in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	109

37. Sound insulation and interior acoustics in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024	109
38. Decarbonisation in the Polish construction industry – assessment of the solutions' potential popularity (points), by primary business profile, December 2024.....	110
39. Decarbonisation in the Polish construction industry – assessment of the solutions' potential popularity (points), by construction type, December 2024	111
40. Assessment of the potential of building materials in the Polish construction industry (points), by primary business profile, December 2024	113
41. Assessment of the potential of building materials in the Polish construction industry (points), by construction type, December 2024	113
42. Assessment of the potential of construction technologies in the Polish construction industry (points), by primary business profile, December 2024	115
43. Assessment of the potential of construction technologies in the Polish construction industry (points), by construction type, December 2024	115
44. Assessment of the impact exerted by sustainable construction principles implemented so far on the final price of manufactured materials on the Polish market (%), by construction type, December 2024	117
45. Increase in production costs aimed to reduce CO ₂ emissions acceptable to manufacturers on the Polish market (%), by type of construction primarily using manufactured products, December 2024	118
46. Assessment of the growth in sales of sustainable building materials – in relation to other materials in the Polish market (%), by type of construction primarily using manufactured products, December 2024	119
47. Assessment of the growth in sales of sustainable building materials in the Polish market (%), by type of construction primarily using manufactured products, December 2024	119
48. Increase in the cost of building materials aimed to reduce CO ₂ emissions acceptable to architects, investors and construction contractors in the Polish market (%), by primary business profile, December 2024	121
49. Increase in the cost of building materials aimed to reduce CO ₂ emissions acceptable to architects, investors and construction contractors in the Polish market (%), by construction type, December 2024.....	121
50. Factors hampering the development of sustainable construction in the Polish market (points), by primary business profile, December 2024	124
51. Factors hampering the development of sustainable construction in the Polish market (points), by construction type, December 2024	125
52. Factors driving the development of sustainable construction in the Polish market (points), by primary business profile, December 2024	128
53. Factors driving the development of sustainable construction in the Polish market (points), by construction type, December 2024	129
54. General contracting companies' experience in publishing sustainability or related reports in the Polish market, 2005-2024.....	131

55. Leading developer companies' experience in publishing sustainability or related reports in the Polish market, 2005-2024.....	132
56. Building materials manufacturers' experience in publishing sustainability or related reports in the Polish market, 2005-2024.....	133
57. Companies broken down by experience in reporting on sustainability or related topics on the Polish market, 2005-2024.....	135
58. Number of EPDs issued by the ITB in Poland, broken down by the location of certified plants, based on declarations available on the ITB's website, 2010-2024.....	138
59. Building materials manufacturers perceived as sustainability leaders in the Polish market according to market players, December 2024.....	144
60. Contractors perceived as sustainability leaders in the Polish market according to market players, December 2024.....	145
61. Climate targets adopted by contractors operating in the Polish construction market, January 2025.....	146
62. Climate targets adopted by property developers operating in the Polish construction market, January 2025.....	147
63. Climate targets adopted by building material manufacturers operating in the Polish construction market, January 2025.....	148
64. Responsible Management Ranking 2024.....	164
65. Most environmentally friendly companies 2024.....	165
66. Sustainable Economy Diamonds 2024.....	165
67. Green Industry Diamonds 2024 – "Green Industrial Construction Leader".....	165
68. Green Industry Diamonds 2024 – "Sustainable Manufacturing Leader".....	165
69. Europe's Climate Leaders 2024.....	167
70. S&P Global – Sustainability Yearbook 2024.....	167
71. Indicators based on ESG ratings published by S&P Global.....	168
72. Risk indicators based on ESG ratings published by Sustainalytics.....	169
73. Risk management assessments based on ESG ratings published by MSCI.....	171
74. Corporate sustainability assessments based on ratings published by ISS ESG, January 2025.....	172
75. Assessments of companies in environmental areas based on ratings published by CDP.....	173
76. Company distinctions awarded by EcoVadis in 2023-2024.....	174
77. Primary business profile.....	202
78. Manufacturers of building materials – leading offer.....	203
79. Primary business profile.....	203
80. Presence in the market.....	203
81. Number of employees.....	204

PMR | MARKET EXPERTS

PMR is a leading research and consulting company in Poland.

As experts in **consultancy and advisory services**, we specialise in providing **business solutions** for a variety of industries and businesses. Our services cover a range of areas, including **market analysis, business strategy, marketing** and **sales, finance** and **project management**, and the solutions we offer are always adapted to the **individual** needs and requirements of our client.

We provide **unique market research** not only in **Europe**, but also **globally** with development forecasts in the economic, technological and social areas. In our work, we cross-reference data from primary and secondary sources, which combined with over **25 years of experience** enables us to achieve **very high precision in our results**. We also identify key trends and events driving market changes in the short and long term.

We also offer **industry reports** on the markets in Poland and other European countries. We specialise in such industries as **retail, ICT, construction, healthcare and pharmaceuticals**.

For years, we have been **coordinating and carrying out field research across Europe** and conducting B2B surveys using CATI and TDI techniques. We are a member of **ESOMAR** (European Society of Opinion and Marketing Research Professionals), with its mission to raise the **quality and ethical standards** of public opinion and market research.

PMR's multidisciplinary team consists of experienced **business consultants, qualitative and quantitative researchers, economists, econometricians** and **sociologists** who have the necessary **skills and knowledge** to help our clients **succeed** in the competitive business world.

PMR offers:

CONSULTING AND ADVISORY

- Development strategy
- Marketing and sales
- Mergers, acquisitions and PMI
- Due diligence

DIGITAL TRANSFORMATION

- Digital strategy
- Digital transformation

MARKETING STUDIES

- Surveys
- Qualitative interviews
- Fieldwork studies

MARKET KNOWLEDGE

- Industry reports
- Industry insights
- Market research on request

ICT

CONSTRUCTION

PHARMA

RETAIL
